PROFILE

I am a web developer with a passion for creating responsive, user-friendly, and scalable web applications. I have experience in developing websites using HTML, CSS, JavaScript, React.js, Node.js, and Express.js. I have also worked on projects involving database management, API integration, and authentication. I am proficient in using Git, GitHub, and VS Code as my development tools. I am eager to learn new technologies and frameworks, and I enjoy working in a collaborative and agile environment.

PROJECTS

Product Landing Page

[Go to the website](#)

- Designed and developed a responsive and interactive product landing page for a VR headset using React.js and CSS.
- Implemented features such as product overview, features, pricing plans, and subscription buttons.

Know Your Bank

[Go to the project](#)

- Built a website that fetches and displays bank details such as name, branch, address, and contact number based on IFSC code or location input.
- Used an API to retrieve the bank data in JSON format and displayed it in a user-friendly table.

Amazon Clone

[Go to the project](#)

- Created a front-end clone of Amazon using React.js and CSS.
- Implemented features such as product listing, links to them, pricing, offers and much more.

To Do App

[Go to the project](#)

- Developed a todo app using React.js and hooks.
- Implemented features such as adding, deleting, editing, and marking tasks as completed.
- Used local storage to persist the tasks across browser sessions.
